

Meeting Agenda

Date: 150330

Facilitator: Carl Albertsson

Participants: Carl Albertsson, Isaac Gonzalez, Filip Larsson and Filip Slottnér Seholm

1. Objectives. Resolve any issues preventing the team to continue

Complete RAD until thursday April 2nd.

Make initial commit on git.

Come up with a project name.

2. Reports from previous meeting

We have now created a gradle project instead of a maven project which is acceptable for this class.

MVC pattern will be explained during lecture in the future.

3. Discussion items

Finish RAD by working in a group together so everyone is on the same page which includes the use cases, analysis model

4. Outcomes and assignments

Filip Slottnér Seholm - Make initial commit for the project.

Working together and finish the RAD. Deadline for the RAD is thursday April 2nd.

Everybody will be assigned one use case each and finish it until wednesday April 1st.

5. Wrap up

We will work with the RAD and the planning together in group. If people want to use more individual time on the project they should research about Android programming.

Next meeting thursday April 2nd.
